

# FOSCARINI

## Nuee Suspension

*Marc Sadler*

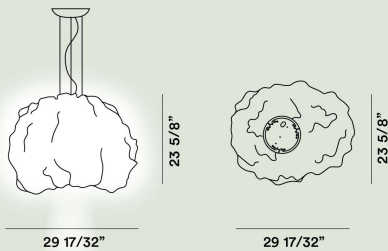

*2019*

A cloud of light to be modelled as you see fit, made with a technical three-dimensional fabric, processed using technology which Foscarini is the first to introduce in the lighting industry. Light-weight and suspended, it offers double lighting. The first light is shed from inside the cloud. The second beam is directed down, to light a supporting surface or walkway.
